**Analysis and Comments**

## Analysis and Comments:

Should market as is. I came to the conclusion through careful market comparison, using comps that are close and have similar characteristics of the subject.

Market Value \$395,000

DEFINITION OF MARKET VALUE: As defined in the Agencies appraisal regulations, the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition are the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and acting in what they consider their own best interests; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

DISCLAIMER: The valuation was obtained from a market analysis and not from a person licensed or certified under applicable law to perform
